have experienced
domestic violence

20% of children
have experienced
sexual abuse

28% of children
have experienced
physical abuse

Monday, November 7, 2016

1:30 to 3:30 p.m.

Fairfax County Government Center, Board Auditorium

12000 Government Center Parkway, Fairfax, VA 22035

RESILIENCE is a one-hour documentary that delves into the science of Adverse Childhood Experiences (ACEs) and the birth of a new movement to treat and prevent Toxic Stress. Now understood to be one of the leading causes of everything from heart disease and cancer to substance abuse and depression, extremely stressful experiences in childhood can alter brain development and have lifelong effects on health and behavior. However, as experts and practitioners profiled in RESILIENCE are proving, what's predictable is preventable. These physicians, educators, social workers and communities are daring to talk about the effects of divorce, abuse and neglect. And they're using cutting edge science to help the next generation break the cycles of adversity and disease. Panel discussion to follow.
